COMO FILTRATION SYSTEMS

Model 120: Portable Filtration System for Oil Polishing & Water Glycol

- Move from reservoir to reservoir.
- Transfer new fluid into machine.
- Clean and reuse waste oil and glycol.
- Heavy duty, rugged, easy to use - built to last.
- **Oil cleaner and drier than new!**

System Includes:

- Welded steel frame (chrome plated), easy to clean large wheels.
- Two large 1000 size vessels (chrome plated).
- Plumbed to transfer only or polish oil.
- Gauge and drain valves with flow and pressure control loop.
- Power “on” warning lights.
- Push button “stop” and “start” buttons.
- Unattend operation with high-low pressure shut down feature.
- 10 ft inlet and outlet hoses and 15 ft electric cord.
- 8 GPM positive displacement quick priming pump.
- 110V, single PH, 60 HZ, 1725 ROM motor.

Why is a Como filter cartridge superior? How clean is clean?

- Filtered oil is **cleaner** than new oil.
- Holds 10-20 times more dirt than other filters - buy 10 or more other cartridges to one Como cartridge.
- Filtered oil is **drier** than new oil.
- Holds one gallon or more of water. Other brands hold little or none at all.
- Highest capacity at lowest price.
- Glycol cleaner than new.
- Will remove oil contamination from glycol.

Price for the above Como system Model 120 \$4,952.65
